Turn Drive Time Into My Time

You go to work, but you're not stuck in traffic. You don't check your watch, wondering if you'll be late. Instead, you read the sports section or choose a song on your iPod. You arrive early for a change and are remarkably stress free. Soon, sleek new trains and buses will make this a reality.

Thanks to the All Systems Go plan that you helped create, you might make Capital Metro your second car.

Capital Metro provides safe and efficient mass transportation solutions for urban and suburban Austin. Our goal is simple: to create and operate a reliable transit system that allows for a highly mobile workforce which will, in turn, ensure a dynamic and vibrant economic future for the region.
